Dataset Source Information

Item	Detail
Dataset name	Digital Payment Transactions (dirty version)
File	`digital_payment_transactions_dirty.xlsx`
Origin	Synthetic dataset generated for this project to meet the 15,000 x 10 requirement
Creator / owner	Generated for DSA 1080A project
Licence / usage rights	No external licence; generated by the group for coursework
Date generated	28/10/2026
Collection period covered	January to December 2025 (as recorded in the timestamp column)
Size	18,000 rows x 10 columns
Lecturer approval (if synthetic)	Yes on 29/10/2026

Generation assumptions

- The data was generated, not collected from real users. Spending patterns, failure rates and regional shares are assumptions, not real-world evidence.
- Errors (typos, missing values, extreme amounts) were added on purpose to practise data cleaning.
- We used ChatGPT to generate the data which we will be using in this project.

Limitations

- Covers one year only (2025) and one country (Kenya).
- Anonymised: no names, phone numbers or account details.
- Findings describe this dataset only and should not be generalised without caution.
